Summary

Software engineer with 10+ years in BI/data, now building production systems end to end. Leads the digital architecture of an EU-funded platform for the European Commission (DG INTPA), spanning full-stack, CI/CD and data pipelines, and trains and deploys ML models. Analytical background that bridges technical work and business outcomes.

Technical Projects

Agentic AI Workflow (n8n, LangChain, Docker, PostgreSQL): Multi-agent system with API integration and image generation, deployed in a cloud Docker container.

Voice Cloning System (PyTorch, XTTS v2, Gradio): Fine-tuned TTS model for Argentinean Spanish voice cloning, trained locally and deployed with Gradio.

Mini-LLM Text Generator (PyTorch, GPT-2): GPT-2 fine-tuned on The Simpsons scripts, deployed to production.

Image Classifier (FastAI, ConvNeXt, PyTorch): Binary classifier using transfer learning with end-to-end training and deployment pipeline.

Self-Hosted MLOps Platform: Production VPS hosting 8 projects across three docker-compose stacks (infra, monitoring, projects). CI/CD pipeline via GitHub Actions to GHCR. IaC in a private GitOps repo. Automated Cloudflare R2 backups.

Technical Skills

ML/AI: PyTorch, FastAI, TensorFlow, Hugging Face, n8n, model training & deployment.

Full-Stack: JavaScript/TypeScript, Python, PHP, React, Node.js, Express, PostgreSQL, Prisma, RESTful APIs, SPAs.

Platforms: WordPress (custom plugins, semi-headless), Mailchimp API, WhatsApp Business API (360dialog), accessibility.

DevOps: Docker, Docker Compose, GitHub Actions (CI/CD), GHCR, Caddy, Grafana, Prometheus, Cloudflare R2, IaC, Bash.

Data/BI: Power BI, SQL Server, Azure Data Factory, ETL (Python/Bash), data modelling, GDPR, analytics.

Professional Experience

Digital Architecture Specialist, GOPA Pro for the European Commission (DG INTPA) – Remote Aug 2026 – Present

- Lead the back-office architecture of the EU Youth Alumni platform and manage a junior IT specialist.
- Building a semi-headless WordPress system: custom PHP plugins as backend/API with an SPA frontend.
- Built an end-to-end event system: registration, QR-code check-in, automated emails and certificates.
- Re-engineered the data model to replace Mailchimp as source of truth; run a daily Python/Bash ETL (cron).
- Set up the engineering baseline: GitHub repo, Git workflow guidelines, staging env and DB, CI/CD.
- Laid the groundwork for WhatsApp messaging via the 360dialog API; led accessibility improvements.

Commercial Analytics & Information Manager, St John Ambulance – London, UK Jul 2022 – Jan 2024

- Led Dynamics 365 rollout and QlikView to Power BI migration; built e-learning dashboard on the Stripe API.
- Normalised databases and automated data entry with SSIS, managing analytics for £60M operations.
- Led team of 6 analysts (4 database, 2 business) supporting revenue operations and reporting.

Business Information & Data Manager, St John Ambulance – London, UK Jan 2015 – Jun 2022

- Led Access to SQL Server migration, managing 4 databases (3 B2B, 1 B2C) with 2M+ records
- Implemented GDPR compliance and automated workflows saving 1 FTE using VBA/Power Automate
- Analysed 20,000+ courses across dimensions including pricing, length, and location

Sr. Business Information Analyst, St John Ambulance – London, UK Feb 2013 – Dec 2014

- Delivered reporting and analytics using QlikView/Excel for Finance, Operations, Marketing, and Sales
- Maintained pricing tools and outbound sales lists representing 15% of total revenue

Client Financial Management Analyst, Accenture – Buenos Aires, Argentina Jul 2010 – Dec 2011

- Developed financial models for IT/consulting services (\$100M projects) and performed SOX compliance audits

Education

Del Salvador University, Buenos Aires, Argentina – 5yr degree in International Cultural and Business Studies 2010

Universität Passau, Passau, Germany – Double degree as above 2008
