Summary

Software engineer with 10+ years in BI/data, now building and running production systems end to end. Leads the digital architecture of the European Commission's EU Youth Alumni platform (DG INTPA), built from scratch, and self-hosts every project below. Analytical background that bridges technical work and business outcomes.

Technical Projects

Teatro Dislocador (React, Express, PostgreSQL, n8n): Theatre site and CMS; Gemini turns Instagram posts into listings.
Air-Quality IoT Monitor (Rust, ESP32-S3, Fastify, PostgreSQL, three.js, React Native): Home-built particle sensor posting readings every minute to a Dockerised API; live 3D dashboard on web and Android.
Agentic News-to-Image (n8n, Gemini, Flux.1, React Native): Picks the day's top headline, avoids repeats and renders it.
Voice Clone (PyTorch, XTTS v2, FastAPI, React Native): TTS fine-tuned for Argentinean Spanish; web and Android apps.
Fugazzeta Detector (fastai, ConvNeXt, FastAPI): Image classifier fine-tuned with transfer learning, served on CPU.
NordVPN on webOS TV (WireGuard, Shell): Single-device split tunnelling on a router, with kill switch and failover.
Self-Hosted Infrastructure (Docker, Caddy, Grafana): Two VPSes watching each other; GitOps deploys, alerts, backups.

Technical Skills

ML/AI: PyTorch, fastai, Hugging Face, Coqui TTS, Gradio, n8n, LLM APIs (Gemini, Groq), model training & deployment.
Full-Stack: TypeScript, Python, PHP, Rust, React, React Native, Node.js, Express, Fastify, PostgreSQL, Prisma, GraphQL.
Platforms: WordPress (custom plugins, semi-headless), Mailchimp API, WhatsApp Business API (360dialog), accessibility.
DevOps: Docker Compose, GitHub Actions, Caddy, Prometheus, Grafana, Cloudflare (Pages, Workers, R2), WireGuard.
Data/BI: Power BI, SQL Server, Azure Data Factory, ETL (Python/Bash), data modelling, GDPR, analytics.

Professional Experience

Digital Architecture Specialist, GOPA Pro for the European Commission (DG INTPA) – Remote Aug 2026 – Present

- Lead the back-office architecture of The Circle of EU Youth Alumni platform and manage a junior IT specialist.
- Started from nothing: set up the repo, PR workflow, CI, anonymised staging, automated deploys and migrations.
- Building a semi-headless WordPress system: custom PHP plugins as the API, with a React/TypeScript SPA.
- Built an end-to-end event system: registration, QR-code check-in, automated emails and certificates.
- Re-engineered the data model to replace Mailchimp as source of truth; run a daily Python/Bash ETL (cron).
- Added two-step sign-in and cookie consent; laid the groundwork for WhatsApp (360dialog); led accessibility work.

Commercial Analytics & Information Manager, St John Ambulance – London, UK Jul 2022 – Jan 2024

- Led Dynamics 365 rollout and QlikView to Power BI migration; built e-learning dashboard on the Stripe API.
- Normalised databases and automated data entry with SSIS, managing analytics for £60M operations.
- Led team of 6 analysts (4 database, 2 business) supporting revenue operations and reporting.

Business Information & Data Manager, St John Ambulance – London, UK Jan 2015 – Jun 2022

- Led Access to SQL Server migration, managing 4 databases (3 B2B, 1 B2C) with 2M+ records
- Implemented GDPR compliance and automated workflows saving 1 FTE using VBA/Power Automate
- Analysed 20,000+ courses across dimensions including pricing, length, and location

Sr. Business Information Analyst, St John Ambulance – London, UK Feb 2013 – Dec 2014

- Delivered reporting and analytics using QlikView/Excel for Finance, Operations, Marketing, and Sales
- Maintained pricing tools and outbound sales lists representing 15% of total revenue

Client Financial Management Analyst, Accenture – Buenos Aires, Argentina Jul 2010 – Dec 2011

- Developed financial models for IT/consulting services ($100M projects) and performed SOX compliance audits

Education

Del Salvador University, Buenos Aires, Argentina – 5yr degree in International Cultural and Business Studies 2010
Universität Passau, Passau, Germany – Double degree as above 2008
